Watching ocean animals, and learning about them, creates a sense of delight and awe. Watch how they move, how they hunt, how they hide! Wouldn't it be great to catch some of that excitement on your own drawings? This book shows you how, with step-by-step instructions. You'll be surprised how easy it is to draw, without tracing, a wide range of ocean animals. Grab a pencil and let's get started!

In general, I like "how to draw" books. Specifically I like the books created by this author and illustrator, Doug DuBosque. My first exposure to his work was through his wonderful Draw Insects (Learn to Draw (Peel)) a number of years ago. That particular book led the student step by step through the process of drawing quite a large number of common insects. The work being reviewed here does the same for sea creatures. Anyone who works around children; children of various ages, will know that the great majority of them like to draw. As a matter of fact many of them find drawing almost addictive even if they are not required to do so. Take a peek inside of any student binder - you will see what I mean. DuBosque has given us a work here that allows the student or the

interested "scribbler" to learn very simple techniques that produce very nice drawings of various critters of the sea. The student is led step by step using simple and basic geometric patterns and shapes to produce a very fine likeness of the animal involved. The visual instructions are quite precise and the text which accompanies each drawing provides many times on angles, shading and perspective which is not found in many such books written for children at this age level. The important thing to remember here is that all the information, as presented by the author, is extremely understandable and all follows a very logical order. I also like the way that this book, while teaching the basics, sets up a great platform on which the student can build upon and become more and more creative on their own as they practice.
