Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

I like this new series so far. The authors are amazing and ones that my students recognize. The students already love 39 Clues and this is similar in style, but it deals with real historical events. They have action, suspense and adventure and challenge the students to think about history in a new way. In book 1, for instance, they explore what would have happened if Christopher Columbus had been thrown overboard before discovering the New World. Love this series!

Curse of the Ancients (Infinity Ring #4) Pena, Matt de la This series is a step up from Magic tree house and is almost level with Haddax's Missing series. All are about children using time travel to solve some of the problems in history. This one specifically looks at the creation and destruction of the Mayan culture, and their greatest legacy the Mayan Codex. Our three adventures are traveling through history trying to solve the mysteries to save a future world from Cataclysm, They are brave souls who are trying to correct the past to save the future. This book is a great middle stage book,

for those entering Middle school years 5-6th grade, the characters are about their ages and the events are comprehensible to them. The series also focuses on historical times and places and helps the children understand those cultures, and that history has rewritten the story to fit the interpretation of the conquerors. It may help teach children that history is a biased story and that they need to look closer to find the real story.

Once again the Infinity Ring series keeps you at the edge of your seat. Follow the kids on another exciting adventure. The twist and turns of this adventure will leave you wanting book five immediately.

This was another fun, entertaining installment in the Infinity Ring series. In this book, Dak Sera and Riq go to the ancient Mayans time. The kindle version includes a black and white copy of the guide. This Historians Guide is about ancient China and the Great Wall. Overall a good purchase.

As an elementary school librarian, this series is more popular than Diary of a Wimpy Kid. The first half of the first book is a little slow as it introduces the key characters and the plot, but once it gets into the actual adventure, saving Christopher Columbus from a mutiny, I can't keep them in the library. Lots of science references and historical events.

I bought this for my son, he is 10. He read the first six and loved them, I recommended it. It is a good item. Thank you.

My son is 10 and has ADHD. He's super smart but hated to read. Until he found this series. Changed everything. Series was made for ADHD kids, especially boys as its action packed and smart.

I can't wait to read the next installment and share with my fourth graders. I love how the series awakens an interest in history and what would change if an event changed in the past.
