# A Deadly Wandering Low Price CD: A Tale Of Tragedy And Redemption In The Age Of Attention

## Synopsis

An ordinary Utah college student named Reggie Shaw fatally strikes two rocket scientists while texting and driving. Pulitzer Prize-winning New York Times reporter Matt Richtel follows Reggie from the moment of the tragedy, through the police investigation, the state's groundbreaking prosecution, and ultimately, Reggie's wrenching admission of responsibility. Richtel parallels Reggie's journey with leading-edge scientific findings regarding human attention and the impact of technology on our brains. Remarkably, today Reggie is a leading advocate who has helped spark a national effort targeting distracted driving, and the arc of his story provides a window through which Richtel pursues actionable solutions to help manage this crisis individually and as a society. A propulsive listen filled with fascinating scientific detail, riveting narrative tension, and rare emotional depth, *A Deadly Wandering* is an audiobook that can change—and save—lives. Read by Fred Berman

## Customer Reviews

Every parent, every teacher, every driver should read this harrowing tale. Richtel has written an eminently readable book; I read in one sitting. What sets the book apart however, is the inclusion of the brain research and the scientific analysis of what goes on in our brains as we are driving...texting or not. We must address this problem and reading this book convinces us there is no time to waste.

Too much detail on research. It will completely explain something we all know that ; no one should

text while driving!
