## Customer Reviews

I have read and listened to a number of programs of a similar variety over the years however this particular CD stands out for its enduring value. I originally picked this up about 9 years ago and the lessons have stayed with me. Yes, the material is common sense, yes, there is nothing new here however, there is something unique in the delivery that over time somehow triggers behavior and thought in such a way as to enable a person to make decisions by employing some perspective towards their personal philosophy and the congruence of their thought and action, at least in my personal experience. In other words one should be more personally conscientious of ones behavior

and exercise discretion with a view to cause and effect. While this is not an epiphany, the discipline itself is difficult to instill. One of the most significant habits that I picked up from the lessons, is posing a relapsing question concerning my career, "Don't ask what you're getting here, ask what you are becoming." This simple admonition, has enabled me to break the spell of being stuck in a career rut and advancing towards professional fulfillment. The other habit that I picked up is the use of a journal, which it turns out is a typical accessory to be found with all seriously successful people. And while carrying a notebook or writing in it will not by itself make you successful, the way in which Rohn demonstrates its use will encourage a similar use, and I can attest to the value from that. Primarily, it will enable one to uncover their personal philosophy through active introspection, and change as necessary/desired. Much of what is passed off as personal development is really emotional fast food.
