Car Buying On A Shoestring Budget: For College Kids And Single Parents Who Need Reliable Transportation (Auto Tips Book 1)

Synopsis

Everyone needs a car but everyone hates the buying process! Without a doubt, nobody likes the process of buying cars. Aside from the fact that you're about to make a major purchase, it can be downright scary if you don't really understand what you're doing. There are so many ways you could get ripped-off or overpay, even by thousands of dollars! To make matters worse, you could end up buying a car that has major problems if you don't know the warning signs to look for. Learn a step-by-step plan for screening used-cars before you even leave home. All you need is a general idea of the type of car you want. 80% of your research should be done from home, and only visit the small handful of cars you might actually buy. This book teaches you a step-by-step plan for screening out all the junk from online sellers in plain language. The good cars have nothing to hide, so they freely share all the pre-purchase information you need. You will learn how to ask the right questions up front and spot potential problems you don't want. You do not need to have any technical car knowledge to find and purchase a great used-car! Find out what a car is really worth before you make an offer. Knowing what a car is actually worth is very empowering. Don't let sellers try to convince you that their vehicle should be more than what you know it's worth. Learn how to confidently offer a specific purchase price and walk-away from bad deals. I will teach you how to negotiate a fair price to the seller, explaining exactly how you arrived at the car's worth. Save a ton of money by letting your car pay YOU each month! It may sound strange to think you could be pocketing money each and every month from your car | but that is exactly what happens when you get yourself into a safe, reliable used-car! Don't make the mistake of buying from a dealership that tries to rope you into loan payments! Most people do not realize how easy it is to find a good car for many thousands less than what a dealer would make you pay. You don't want to be paying for your car month-after-month for years - pay yourself instead! This book is packed with useful information covering every aspect of buying a used-car. Use this advice like a checklist every step of the way so you won't forget anything important. The chapters are ordered in a logical way that mirrors the process I use to buy my own cars:

Chapter 1: How to make your car PAY YOU each month
New vs. Lease vs. Used
Getting out of a loan you already have

Chapter 2: Research the best used-cars from your couch
Finding a decent used car cheap
Where to start your search for used vehicles
Tips for screening Craigslist offerings
Filter private-party only with price range
Initial screen for prospective buys
Lookup the current fair value

Chapter 3: Visit only cream-of-the-crop cars you find
Meeting sellers and inspecting vehicles
Test drive the car to get a good feel
Red flags and warning signs to beware

Chapter 4: Complete your due diligence before making an offer
Research the vehicle history records
Special note about "salvage" or "total loss"

titlesHire a local mechanic or bring a friendRegional government inspectionFinal comparisons and gut feelingsChapter 5: Negotiating the saleKeep the bluebook target in mindBe willing to walk away from some dealsTitle and notary requirementsPlease click the link above to Buy Now.

Customer Reviews

This book can be a great tools for those who are like me searching for an affordable used car. As a blonde woman I don't want to be taken a fool and get charged an unreasonable amount for a car. This book helped me by telling where and how to get started looking for a car, what are the deal breakers in ads, and it even provided sample listings from Craigslist.

Well written and easy to read. If you are in the 2nd hand car market then i suggest you get this book. What I found really helpful was the step by step process the author takes you through from viewing ads on Craigslist to buying a vehicle.Well worth the price, nice job.

Well, my kids are grown but the grandkids are getting older. I thought checking this out might help

me in assisting my kids in looking for cars for the grandkids. It's been many years since I have bought a car that wasn't new off the lot, so this gave me a lot of tips that will help them to make smart decisions when looking for the grandkids first car. Of course, it goes without saying to have a mechanic look at the car - although this must not really be true - considering all the cases on court tv about people wanting to get out of their car buying choice. All in all - a good checklist to help you get on the right track - and watch out for those "dealers" masquerading as "private sellers."

Excellent and detailed book about buying cars on a budget. I've never had a huge budget to buying cars and it would have been helpful to read this book first. Insightful and informative, this book will guide you through the world of buying cars straight from the buyer, which is much less expensive than buying from a dealer. You'll not learn how and where to buy the car, but how to buy a car that won't break down in a few hundred miles. Highly recommended.

I don't actually need to buy a car at this moment, but this book makes me feel like I could if I needed to! Well written and right to the point I read this book on a single sitting and I was content through the whole thing. A happy tone and no fancy jargon sealed the deal for me. Highly recommend this if you are trying to figure out the keys to buying a reliable used car.

As someone who needs to upgrade from a car to an SUV within the next year, this is a very useful guide. I appreciated that it had sample ad photos throughout, as well. It will definitely help me cut down on the vehicle options.

This is a very helpful book if you are considering buying a used car. The market options (Craigslist, etc) are tough venues to navigate. This book takes you through the process step-by-step. Great support!!
