# The Remaking Of The Mining Industry

## Synopsis

The industrialisation of China prompted the biggest commodity boom of modern times. Soaring prices gave rise to talk of a commodity super cycle and induced a wave of resource nationalism. The author, who was chief economist at two of the world's largest mining companies, describes how this resulted in a transformation of the global mining industry.

## Book Information

Hardcover: 256 pages

## Customer Reviews

Excellent book on the mining industry recent history, and current transformation. David Humphreys describes the chain of events that lead to the current industry situation, and sketch what the future state could look like. A must read for anybody looking after having a better understanding of the industry. Very highly recommended.
