DK Workbooks: Math, Pre-K

Synopsis

Focusing on the very basic principles of math including counting to ten, shapes, money, and reading and writing numbers, DK Workbooks: Math: Pre-K will help preschoolers learn and understand first math concepts. Developed in consultation with leading educational experts to support curriculum learning, DK Workbooks: Math is an innovative series of home-learning math workbooks that is closely linked to school curriculum and helps make learning easy and fun! Each title is packed with exercises and activities to strengthen what children learn in school. With clear questions and supportive illustrations to help children understand each topic, the books provide practice to reinforce learning and understanding of key concepts, such as fractions, times tables, and shapes. A parents' section contains answers, tips, and guidance to provide support, and a certificate of achievement will reinforce confidence in kids by rewarding their accomplishments. Supports the Common Core State Standards.

Book Information

Series: Dk Workbooks

Paperback: 60 pages

Age Range: 3 - 5 years

Grade Level: Preschool - Kindergarten

Customer Reviews

At Costco they were selling a Pre-Kindergarten Jumbo Workbook by DK for approximately \$11. The Jumbo book ended up containing all 5 of the DK workbooks for pre-schoolers. I think this book would be perfect for a 3 year old, but could see some pages used with a 2 year old and others with a 4 year old. The math section has a title page with mice eating cheese, a table of contents, followed

by each worksheet. All images are in black and white so they can be colored, but the pages do include some color on the borders and edges - in my copy its a purple-pink. The top of each worksheet has a fact to read and below it some sort of interactive question/instructions. Some of the facts really need more teaching / images to ensure the kid is actually understanding and learning the info... but at least all of the interactive question/instructions seem to connect to the fact. Some of the worksheets on direction would be better included in the geography book. The math section covers: numbers 1-10, shapes, counting, greater and less than, same/different, adding/subtracting simply, size, weight, etc. Blank practice pages are included but they are not needed for any of the projects. To get the best learning out of this workbook, you need to complete the workbook with your child following the parent instructions at the back of the book. This is only a brief overview so if your child does not know any of this material you have to supplement. Overall, you may need to do some supplementation to ensure true learning with your child. However, out of all the workbooks I have seen, at least this book does not get stuck forever in tracing the numbers!

This is a good workbook but Some pages are too difficult for pre- k, it's asks for the child to read and write out words with the exception of a few pages good book with number tracing, shapes, counting, and sorting&matching

This is a nice workbook and a great addition to my son's collection. He has a fixation with doing his workbooks, but I'm certainly not complaining. He's a smart kiddo, and if he wants to do a little extra work voluntarily, then who am I to stop him? The material in this book is on almost the right level for him, although some of the concepts he has far beyond mastered. I bought some kindergarten ones for him too though, which have similar but slightly more advanced content, so combining these is really great for him. Definitely recommend for preparing kids for school, supplementing their preschool, or giving them more educational activities to participate in.

Son wants to do it a learn and is excited. To learn. There is only 47 pages but comes with answers.

Great workbook for my 3 year old at a good price.

My 3 year old loved this book

EXCELLENT Product!!

I like this book. It is very easy to follow and the stars are great motivation.
