Sometimes an author just really nails it. As the 'MLM whole truth' guy, I like to think that I tell it like it is. But frankly, no one does a better job of describing the real value and benefits of Multilevel or Network Marketing, without exaggerating a single fact, than Richard Brooke. And let me tell you, after reading it, I think you will agree that the truth is good enough! The case for network marketing is well made. This newly revised, 118 page 2013 edition is an excellent belief-building guide for anyone considering Network Marketing. Here's what you will find in this compelling, easy-to-understand recruiting tool: A brief discussion of the economic uncertainty many are facing, and the challenges that traditional means commonly considered for building financial security pose. A revealing explanation of the myths and realities of Network Marketing (some may surprise you). Industry statistics and third-party endorsements that reinforce the power of Network Marketing as a wealth-building vehicle. Stories of real live Network Marketing millionaires, including their tips for success. There is only one section of the book I might have done differently. On page 21 Mr. Brooke describes... Myth #2: Network Marketing is an opportunity for someone who is not doing well financially to make some money--maybe even a lot of money. But then, takes it back in the next paragraph: Unfortunately, many of the success stories have perpetuated this myth with a rags-to-riches theme. Although there are enough people to substantiate the myth, it is still a myth. If it happens, it is not a myth.
