## Customer Reviews

Food for humans has become an integral part of the lifestyle. Probably each of us can imagine life without food. And the problem is if the shops will disappear all the food. The book talks about how to survive in such conditions. A great book

This book is not the kind of book I enjoyed reading- but that's precisely the reason I think the author did a good important job writing this one. I read the whole book, getting a clue on how to prepare to a worst-case scenario seems probable every day. The information provided might be crucial one day. This book is a must-have!

I got this book out of my curiosity about what is the real meaning of death of money. So far i only understand that we should keep cash at home in the case of a serious emergency, so we may able to buy or get something if we can't go to the bank right away. This book share about how to survive and prosper in the coming economic collapse, awesome information.

After reading this book i know what i have to do in a crisis situation. This book forced me to think of the future. It also learned me a lot of things for example How to find food and water. Great read!

If there will be a time when non of the systems which "lead us through life" today is working anymore, than you need an idea of what to do and how to be prepared. This is what this book does.

It shows how to prep for the day after ....

This book trains us for the worst options of disorder of economy. So far I only understand that we should keep cash at home in the case of a serious emergency, so we may be able to buy or get something if we can't go to the bank right away. Great surviving book

We were all faced with economic crisis recently and this book is a great explanation on how to be prepared for these unpleasant times. . If you are mentally prepared to this, you will not receive a shock whenever such a situation arises. I like the approaches of the author to crisis and economical collapses and ways how he proposed to help himself. This book gave me so many excellent tips and I am sure I will save much more money if I apply them in my life. Financial crisis is one of the most frightening things in our life and we usually try to avoid it, but sometimes it doesn't depend from us. And we can just be ready and know how to help and survive in this case .Nobody is ever fully prepared for that. But in this book you can get all the basic things how to prepare yourself, what you have to do for the unwanted situation. It is always better to remain prepared rather than be surprised....so I would really like to recommend this book for you!

I read this book with a great interest. This book trains us for the worst options of disorder of economy. Also she gives to us a lot of advice as it is better to operate the finance. How to prepare itself for cataclysms. How to survive during a collapse of monetary system. This book forced me to think of the future. In the book there is a lot of useful information. I recommend!
